

Title: Setting Product Time in the HikDashCam App

1. Introduction
 - Purpose of the document
 - Overview of the HikDashCam app
 - Importance of setting the correct time for accurate recordings
2. Installation
 - Download and install the HikDashCam app from the Play Store
 - Ensure the app is successfully installed and launched on your device
3. Setting Daylight Saving Time (DST)
 - Open the HikDashCam app
 - Navigate to the "Settings" menu
4. Enabling DST
 - Within the Settings menu, locate the "DST" option
 - Toggle the DST setting to the "ON" position
5. Adding DST Dates
 - Access the DST configuration within the app
 - Follow the steps below to input the DST dates for Canada:
 - Start Date:
 - DST in Canada starts on the 2nd Sunday in March
 - Locate the "Start Date" field within the DST settings
 - Enter the date corresponding to the 2nd Sunday in March
 - End Date:
 - DST in Canada ends on the 1st Sunday in November
 - Locate the "End Date" field within the DST settings
 - Enter the date corresponding to the 1st Sunday in November
6. Saving and Applying Changes
 - After entering the correct DST dates, save the settings
 - Ensure the changes are applied by verifying the updated DST configuration
7. Conclusion
 - Recap the importance of setting the product time accurately
 - Confirm that by following the provided steps, users can correctly set the DST configuration within the HikDashCam app

Note: This document provides a general guideline for setting the time and DST configuration in the HikDashCam app. The specific steps and interface elements may vary slightly depending on the app version and device platform.
