

BIG PICTURE & DETAILS IN ONE VIEW

TandemVu 7-inch PTZ Camera

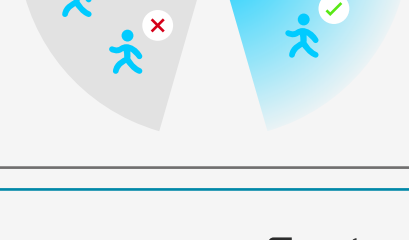

TandemVu PTZ cameras feature Hikvision's next-generation technology, integrating a bullet camera and a PTZ camera in one unit. This exciting new type of camera provides wide view and small details in "tandem", inspiring its name. The overall view remains even during the pan, tilt, and zoom manoeuvres, so that users will see everything and miss no detail when it matters. They have unparalleled situational awareness from the moment they set up the camera.

The newly-released models support **ColorVu technology**, providing vivid, colourful imaging - even in darkness.

Comparison to Conventional Cameras

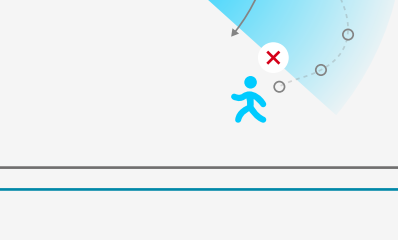

Single PTZ Camera

Loses coverage during zoom, pan and tilt manoeuvres

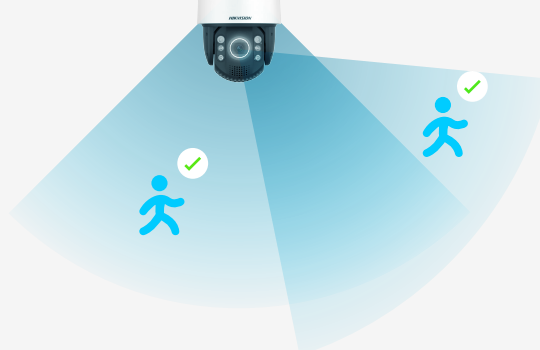

Single Bullet Camera

Loses coverage when the target leaves the field of view

TandemVu 7-inch PTZ Camera

Full coverage maintained during pan, tilt and zoom manoeuvres

Big Picture & Details in One View
